You Will Never See This Clock Again is a procedurally-generated zine about procedurally-generated clocks. There's only one unique copy of this zine and every clock is generated only once, ever.

Each clock in the zine comes with a scannable QR Code link that lets you save the exact clock on your mobile or desktop.

YWNSTCA is part of the You Will Never Read This Zine again project, where I explore how the principles of generative art—simple rules lead to complex outcomes—can scale unconventional design in places where it would be difficult otherwise, e.g. multi-page publications.

Garlic Cracker Press
is an indie
publishing project
